

Ovotone 77S

Designed specifically to fortify breeding flock rations, with the flexibility to be fed free choice to sheep on pasture. Self-feed Vigortone Ovotone 77S as the only source of supplemental minerals and salt to sheep. Consumption may vary with the quality of pasture or forage available. Provide a continuous supply of clean, fresh water.

Balanced nutrition aids in peak breeding and lambing. Vigortone sheep products encourage maximum milk production and lamb development. Market lambs benefit from top growth and improved feed conversion. Because wool is almost 10% mineral, Vigortone's sheep products can help boost the wool clip by as much as 2-3 pounds.

GUARANTEED ANALYSIS:
